

Press Release

MKS PAMP Acquires Full Ownership of Gold Token S.A. to Relaunch Leading Real-World Asset Backed Tokenized Digital Gold Offering

Geneva, 20 November 2025— MKS PAMP S.A., part of MKS PAMP GROUP and a global leader in precious metals, today announced it has acquired full ownership of Gold Token S.A., marking a significant step in its strategy to lead the next wave of Real-World Asset (RWA) tokenization.

With this acquisition, Gold Token joins Group's global ecosystem, combining trusted bullion infrastructure, institutional networks, and distribution capabilities with the transformative power of blockchain to accelerate adoption of real-world asset tokenization.

The Gold Standard for Tokenized Real-World Assets

Gold Token has created one of the first physically backed gold tokens, DGLD, built to enable users to hold ownership of allocated, physical gold via a digital token that is fully auditable, securely vaulted in Switzerland, and transferable across blockchain networks. The token is already live on Ethereum, and under MKS PAMP's full stewardship will now be re-launched with expanded utility, institutional-grade compliance, and multi-chain operability to support broader access and adoption. In the next phase, the initiative will extend beyond gold to include additional precious metals.

With a global trading desk, a broad network of institutional clients, and production capabilities behind its world-renowned bullion products, MKS PAMP is uniquely positioned to support the liquidity, accessibility, and credibility required to scale this next-generation RWA.

"Bringing physical gold on-chain is no longer a proof of concept. It's a necessity for the future of global finance. With this acquisition, MKS PAMP is doubling down on the opportunity to tokenize Real World Assets by offering an unmatched combination of physical trust and digital access. We're uniquely positioned to deliver the gold standard in tokenized assets: secure, liquid, and truly global, supported by our institutional trading and custody capabilities and our deep relationships across precious metals markets," said James Emmett, CEO of MKS PAMP.

"Gold has long stood as a trusted store of value, and tokenized gold now carries that legacy into the digital age. With the re-launch of DGLD which is under preparation, we aim to bring reliability and transparency to institutions and individuals, starting most likely in the decentralized arena. Positioned as a high-quality real-world asset for collateral, settlement, and potential yield use cases, Gold Token seeks to bridge timeless value with the evolving future of finance," added Kurt Hemecker, CEO of Gold Token.

Fueling the Future of RWA with Gold

This relaunch comes at a time when institutional and retail interest in real-world asset tokenization is accelerating. By enabling physical gold to exist natively in blockchain environments, the offering unlocks powerful use cases across collateralized lending, cross-border payments, DeFi liquidity, and regulated financial infrastructure.

MKS PAMP

Backed by one of the most trusted names in the precious metals industry, the token is positioned to become a cornerstone of the growing RWA ecosystem. It marries the stability and trust of physical gold with the flexibility, transparency, and composability of blockchain networks.

Gold Token is currently inviting Web3 ecosystem partners to collaborate on enabling the token across multiple blockchain platforms, expanding access and interoperability for tokenized precious metals. For partnership opportunities, please contact partner@gtsa.io.

About MKS PAMP

MKS PAMP is a global leader in precious metals, specializing in trading, refining, and minting gold, silver, platinum, palladium, and other platinum group metal products. Part of the MKS PAMP GROUP, it brings over 60 years of expertise and operates one of the industry's most advanced refineries and mints. Headquartered in Switzerland, the company upholds the highest standards of quality, sustainability, and responsible sourcing. MKS PAMP is one of only three approved Good Delivery Referees of both the LBMA and LPPM worldwide. Its flagship brand, PAMP, is the world's leading bullion brand, known for the iconic Lady Fortuna™ design. Trusted by financial institutions, investors, and industries, MKS PAMP champions transparency and ESG principles.

About Gold Token SA

Gold Token SA, the tokenization arm of MKS PAMP, transforms gold and precious metals into secure, blockchain-based digital assets. Its flagship token, DGLD, represents allocated physical gold on the blockchain and bridges traditional finance with tokenized real-world assets. Based in Switzerland and regulated through VQF, a FINMA-supervised SRO (www.vqf.ch), Gold Token SA brings institutional-grade trust and transparency to digital gold ownership.
